Ltd. "EM CABEL" is a young, dynamically developing company, started its work on March 25, 2010. But, despite its young age, our company increases the rate of development confidently. Today the company "EM-CABEL" produces:

- uninsulated wire, Type A (analogue to AAC), Type AC (analogue to ACSR). Applied in overhead power transmission;

- uninsulated, heat-resistant wire, Type ACPT (analogue TACSR) with aluminum clad steel bearing core and Al-Zr alloy outer conductor. Applied in high-voltage transmission line;

- corrosion-proof OPGW cable, Type GTK, twisted of aluminum clad steel wires;

- self-carrying insulated wires, Types SIP 1, SIP2 (analogue to AMKA), SIP 3 (analogue to AXKA), SIP4. Applied in power overhead lines and in aerial lighting network;

- plastic insulated power cables on the operating voltage of 0,6, 1 kV and 3 kV.

- fire-resistant, non-propagating combustion, with low smoke and gas emission power cables;

- supporting core for SIP-types cables;

- aluminum-clad steel wire;

- aluminum wire and wire produced of aluminum-steel alloy.

In the factory the newest and modern equipment is installed and put to operation, supplied by such worldwide-known companies as "Queins" and "Eurodraw" (Germany), Mario Frigerio". "Cortinovis Machinery SPA" (Italy), "Proton" and "Threesixty Parkgate Technology Ltd" (England), Nokia Extrusion (Finland, Switzerland).

The quality of our production is approved by various certificates, among which there are certificates of international standards for quality management ISO 9001-2008 and Russian standard GOST R.

Convenient geographical location of our factory gives the opportunity to deliver our production to any place around Russia and Former Soviet Republics in the shortest time.

We always try to build sound relations with our partners, which are based on exclusive trust and mutually advantageous cooperation.
