“EM-KAT” Ltd. began its activity in February 2012

The basis of basing of “EM-KAT” Ltd was a project of organization of production – manufacturing of the Aluminum rod and aluminum alloy rod . The wide perspectives of realization of this project due to great potential of Russian market of the metals, connected with the general development of the domestic industry.

“EM-KAT” Ltd is the new factory that produces aluminum and aluminum alloy rod such as AlZr rod and alloy 6101. The production is making on the newest Italian equipment by the company Continuuus-Properzi S.p.A. This line is able to produce the rod by continuous casting method. The capacity of the line is 2.0 tons per hour. The rod from the aluminum alloy is used for making the various cables.

The main aim of the “EM-KAT” Ltd is the development of the new production of the European level of the organization of labor, which manufactures the high quality competitive products for the prices appropriate for Russian buyers.

We hope that high technological equipment, knowledge and the experience of our employees let our company make a worthy contribution to the development of the Russian industry.
